

# METALWORKING AND ASSEMBLY

## CHARACTERISTICS

Costa Rica is a leader in sophisticated production processes in Latin America, with an industry characterized by a solid supply chain, strong cost reduction programs, ample capacity for problem solving, prototyping, design for manufacturing and R&D&I. This sector is characterized by a long history of over 100 years of providing competitive solutions for the market.

## Value Proposition:

- Flexibility in volume of orders under a "High Mix-Low Volume" scheme.
- Experience in "turnkey" projects.
- High capacity for the design and development of innovative solutions customer specifications, using the latest technology.
- Manufacturing and development of equipment for specific processes in a variety of industries.
- Implementation of process automation projects.
- Technical support in terms of opportunity and flexibility for the customer.
- Surface treatment of components with different materials and applications (surface coatings, heat treatments).
- Strong supply chain made up of companies in the metalworking sector to meet the needs of a dynamic aerospace and medical device industry.
- Existence of a solid and developed aerospace cluster with more than 25 years of experience, supplying the tiers of original equipment manufacturers (OEMs).

## OUR OFFER:

- Accessories.
- Spare parts.
- Assembly.
- Cutters.
- Tools.
- Precision mechanics.
- Grinding.
- Embossing.
- Engraving.
- Laser welding.
- Welding.
- Plating.
- Etching.
- Anodizing.
- Molds.
- EDM Wire Manufacturing.
- Nano and micro machining.

## OUR TECHNOLOGY:

- Mill powers.
- Lathes.
- Milling machines.
- Erosion.
- Rectifiers.
- CNC.
- 3D printers.
- Quality inspection.
- Welders.
- Laser welders.

### Certifications:

## Statistics

284 exporting companies.

\$679.5 million USD in annual export value.

Central America (42%), the United States (13%) and Dominican Republic (8%)
